BUILDING OPERATIONS

SOUTH AUSTRALIA

JUNE QUARTER 1964

SCOPE

This bulletin gives information about "new building" operations in South Australia; in addition to a summary for the period July 1959 to June 1964 it shows details concerning houses and flats, other buildings, employment in the industry, and dwellings in local government areas. The information has been compiled from returns collected from all builders of "new buildings".

DEFINITIONS

NEW BUILDING: Additions of £5,000 and over to existing buildings (other than houses) are included, but minor additions, alterations, repairs and renovations, and all construction activity such as railways, bridges, earthworks, water storage, etc., are excluded.

VALUE: All values shown exclude the value of land and, except in Table 4, represent the value of buildings upon completion (see also "Completion"). Values shown in Table 4 represent the amount of work done on new buildings during the period and are not subject to the fluctuations from period to period noted in Table 3 in the values of "new buildings other than dwellings"; these fluctuations are partly the result of the unequal incidence of individual large contracts.

COMMENCEMENT: A building is recorded as commenced when work on the foundation has begun.

UNDER CONSTRUCTION: Once commenced, even though work on it may have been temporarily suspended, a building is classified as "under construction" until its "completion".

COMPLETION: A building is regarded as having been completed when the contractor has fulfilled the terms of the contract or in the case of an owner-built house when the dwelling is either completed or occupied (whichever occurs first). However, the value in all cases is that of the building as a finished project as planned.

COMMENTS

2,849 houses were commenced and 2,697 were completed during the June quarter 1964. Commencements were 11 less than in the preceding three months. Completions were 430 more than in the previous quarter, but 218 less than the record of 2,915 in December quarter 1963.

The number of flats commenced (480) and completed (318) during the June quarter are both records, exceeding the previous highest totals of 374 commencements in the March quarter 1963 and 283 completions in the December quarter 1960.

An increase of 779 in the number employed on all jobs of builders of new buildings at 30th June raised the total to a new record of 14,532. This was 399 more than the previous highest figure of 14,133 at 11th December 1963.

During the twelve months ended June 1964, 9,569 dwellings (83.2% of the State total) were completed in or near the Metropolitan Area; 48.9% were inside the Metropolitan Area but a further 34.3% were completed in the near-metropolitan District Councils of Munno Para, Noarlunga, Salisbury and Elizabeth, and Tea Tree Gully.

Other	2,312	2,274	2,513	2,345	2,451	2,583	2,535	2,785
Total	12,416	12,345	13,338	12,948	13,585	14,133	13,753	14,532

Note: Building employment covers all contractors and sub-contractors and employees of contractors, sub-contractors, and Government instrumentalities, who on the day specified were actually engaged on the construction, alteration, repair, and maintenance of buildings, but excludes persons working on owner-built houses or for contractors or sub-contractors who undertake only alterations, additions, repairs, and maintenance. Persons "actually engaged" include those temporarily laid off because of weather. Some duplication may occur as a result of frequent movement between jobs or because some persons (such as electricians) may work on several jobs which are under construction simultaneously.
